☒ ISPRINT-207

iSprint - Get current user balance from Blender and create a user transaction on Vortex

Description

During the migration process we need to get the users outstanding Blender balance and then create a user transaction on Vortex for it. This is done under the `vortex-user-transactions` table.

It's crucial that we do this as a step 2 action as part of our Migration chain so this **must** come after we've already set up the user data on DynamoDB.
